

Pre- Care Instructions for Brows

1. If you are using an eyebrow hair growth serum/booster, please immediately stop using the serum/booster for at least 2 months prior to your scheduled appointment.
2. Do not tan for 72 hours before appointment.
3. For your safety and the safety of your baby, if you are currently pregnant or breastfeeding, we cannot perform any cosmetic makeup service.
4. Avoid facials, chemical peels, laser treatments, microdermabrasion, Botox injections and fillers in the brow area for at least 2 to 3 weeks prior to your appointment.
5. Avoid using Retin A (or Retinol) or Glycolic Acid on your brow area (face is ok) for at least 30 days before treatment.
6. If you have used Accutane within the last year, we will be unable to perform the procedure as it leads to increased swelling, bleeding, and pain. It will also impede your skin's healing process.
7. Must be free of skin irritations, such as sunburns, psoriasis, seborrheic dermatitis, and severe acne on the treatment area.
8. You must be off of any antibiotics 2 weeks prior to your scheduled procedure.
9. Please do not wax, tweeze, thread, or tint eyebrows at least 3 days before your visit. We will shape and clean up the entire brow area during the service.
10. Avoid blood thinners such as Ibuprofen, Aspirin, Aleve, Vitamin E, and Fish Oil at least 48-72 hours before the procedure, unless it is medically necessary, in which case we will need a doctor's note giving permission to temporarily stop the use of your blood thinners and receive cosmetic tattoo services.
11. Avoid alcohol or caffeine consumption 48 hours before, and the day of your scheduled procedure.

Pre- Care Instructions for Brow Lamination

1. Do not wax, tweeze, or thread for 72 hours prior to appointment.
2. Do not color brows 14 days before appointment.
3. Avoid exfoliants and retinol products 14 days before appointment.
4. Please come to your appointment without makeup on

After Care Instructions for Brows

1. Every morning and night, wash your brows with Cetaphil or Cerave, pat dry and apply a thin layer of ointment that was given to you in your aftercare bag.
2. Do not touch or pick at your scabs. Allow them to naturally exfoliate. Picking off the scabs will also remove pigment.
3. Avoid sleeping face-down for at least 7 days and keep your pillowcase clean. This will allow your brows to heal and not have scabs removed prematurely.
4. Avoid long hot steamy showers and wash your face with hot water for at least 7 days. The brows and face should be washed with cool water until completely healed.
5. Make sure nothing unsanitary comes in contact with your treated brow area until completely healed. After a brow service, the skin is open and vulnerable. It's imperative to keep the area clean to avoid infection.
6. Do not schedule facials, Botox, chemical treatments, or microdermabrasion for at least 30 days.
7. Do not use makeup on the Brow area for 14 days.
8. Avoid excessive sun exposure and tanning for 14 days.

What to expect during healing process

1. Brows will appear darker the first 5 days.
2. They may become itchy and scabs may form. (Do NOT pick)
3. Pigment may go through a “ghosting” phase where it looks as if it disappears. This is normal. The pigment will most likely resurface. At the 6-8 week touch up, and lost pigment will be replaced.
4. Brows will appear patchy the first few weeks until completely healed.
